

To whom it may concern

RE: CPD and registration

1. could we please have more information regarding the mix of CPD activities especially reviews with colleagues, journal club and reflective journalling
2. unsure why OTs will have to do 30 hours of CPD when other allied health professions do 20 hours of CPD
3. a paragraph on how a course or journal impacts my work practice is more professional than the reflective comments provided as examples. These appear to be very student focussed.
4. more courses may have to be offered and cheaper online workshops such as the option that physiotherapists have may be beneficial. managers are going to be reluctant to have staff missing so many days and work time is busy enough with constant staff changes to allow journal club time.

I hope these comments have been valuable feedback for your discussions
