

To whom to may concern,

In relation to the Draft registration process, please accept the feedback below.

1. CPD activities need to be related to "maintaining & improving competence in their area of practice" or "chosen area of practice" - setting CPD goals in advance maybe difficult for therapists working in rotating positions where they move around clinical areas frequently, also new graduates or therapists who are uncertain of their "chosen area of practice"

2. "Undertaking day to day work duties can't be counted as CPD hours" - however then in the example of a CPD record includes the hours of participation in Department in-services (Category 2 Informal training etc) and supervision of OT students (Category 3 Engagement in the Profession) - is this not considered "day to day work duties" as these activities occur during work time??

Thank you for your time.
